

Working voltage: **to 750V 50/60Hz**
 Insulation test voltage: **3000V 50Hz**
 Rated current: **4 - 150A**
 Inductance: **7,32 - 0,195mH**
 Voltage drop: **4% (In, 230V 50Hz)**

Line chokes designed to work in single-phase, converting power supply circuits in industrial applications. Often used for reducing the value of short-circuit or inrush current. They also operate as smoothing and filtering harmonics distortions chokes. They consist of EI iron cores with air gap, a copper winding on a uniform bobbin, metal footing and electric terminals. Core welding and impregnation provide high mechanical resistance and anti-pollution barrier. Protection grade IP00, max ambient temperature 40°C, thermal class of insulation F (155°C). Manufactured in compliance with EN61558-2-20.

Type	Current [A]	Inductance [mH]	Dimensions [mm]							Mounting	Weight [kg]
